PROJECTS

Weather Dashboard

User inputs a city name to view the current weather information, a five-day forecast, and a clickable search history; uses HTML/CSS, jQuery.
GitHub Repo: https://github.com/CrainDavis/WeatherDashboard application: https://craindavis.github.io/WeatherDashboard/

BESTimator

User answers questions pertaining to estimating the quantity, weight, height, etc. of something in an image, plays 5 questions daily, and competes with others; uses Bulma and Handlebars, as well as a MySQL/Sequelize database.
GitHub Repo: https://github.com/CrainDavis/Bestimator application: https://the-bestimator.herokuapp.com/

Color Story

This is an app for artists and designers who work in multiple media to showcase all their work on a "ColorWall", which users can filter, browse, and view information about the post and artist; the app uses Material-UI, React, and MySQL/Sequelize.
GitHub Repo: https://github.com/Mleuer/Color-Story application: https://color-story.herokuapp.com/
